

SUPERSIX™ ORGANIC LIQUID NITROGEN FERTILIZER

The first true 100% plant available OMRI Listed organic liquid nitrogen fertilizer. SuperSix™ is a honey-colored, translucent, nitrogen-fertilizer that will flow freely through irrigation/fertigation delivery system as well as drip-tape delivery fertigation systems up to 180 mesh. SuperSix is easy to handle, will not settle, is shelf stable, and has an exceptionally low freezing point. It is free of pathogens and harmful bacteria due to micro filtering and pasteurization steps in our manufacturing process. It is a revolutionary fertilizer that delivers great results and higher crop yields.

SuperSix™ Features
